AAMIR MAJEED

+91 8360991407 aamirmajeedkhan570@gmail.com

Software Developer | Node.js • React.js • AWS • CI/CD • WebRTC • Real-Time Communication Systems

Software Developer with experience in Node.js, React.js, AWS Serverless, CI/CD pipelines, WebRTC, and real-time communication systems. Skilled in building scalable cloud-native applications, REST APIs, telephony integrations, and AI-powered solutions. Experienced with AWS Lambda, DynamoDB, Serverless Framework, Asterisk, and modern JavaScript/TypeScript ecosystems.

Technical Skills

- **Languages:** JavaScript, TypeScript, SQL
- **Backend**: Node.js, Express.js, REST APIs, Webhooks, Socket.IO
- **Frontend:** React.js, HTML5, CSS3
- **Cloud & DevOps**: AWS (Lambda, DynamoDB, Cognito, EC2, SNS, KMS), Serverless Framework, CI/CD, PM2.
- **Real-Time Communication:** LiveKit, WebRTC, Twilio, SIP/VoIP
- **Databases:** MySQL, PostgreSQL, MongoDB, DynamoDB
- **Familiar Technologies:** Python, LangChain, Hugging Face, Docker, Asterisk
- **AI:** Google ADK, LangChain, Agentic AI

Work Experience

Software Developer at LegitBytes *2024 to 2026*

Tazzo AI

- Designed and developed RESTful APIs using Node.js and Express.js for AI-powered voice automation and real-time communication workflows.
- Integrated LiveKit, Twilio, and Asterisk to enable telephony automation, voice calling, and real-time communication features.
- Developed secure payment and subscription workflows using Razorpay, including webhook-based event handling.
- Designed and optimized relational database schemas using PostgreSQL and implemented data access layers with Prisma and Drizzle ORM.
- Built an AI-powered meeting scheduling solution by integrating Google ADK and Cal.com for automated appointment booking.
- Managed backend deployments, application monitoring, and process management using PM2 and AWS infrastructure.

Insmeal Store App

- Developed and maintained features for a restaurant management and online ordering platform using React.js, Node.js, and AWS services.
- Integrated secure authentication and Multi-Factor Authentication (MFA) using AWS Amplify and Cognito.
- Leveraged AWS Lambda, DynamoDB, and Serverless Framework to build scalable cloud-native backend services.
- Collaborated with cross-functional teams to deliver new features, bug fixes, and performance improvements.
- Secure authentication and SMS-based communication features.

Education

- Master's of Computer Applications , University of Kashmir 2023
- Bachelor's of Computer Applications, University of Kashmir 2021

Certifications

- MERN Stack Developer – Udemy
