Software Developer | Node.js ● React.js ● AWS ● CI/CD ● WebRTC ● Real-Time Communication Systems

PROFESSIONAL SUMMARY

Full Stack Developer with experience in Node.js, React.js and TypeScript, building REST APIs, AWS Serverless backends and CI/CD-deployed applications. Background in WebRTC-based real-time communication systems, telephony integrations and AI-powered applications, combined with current enterprise application development experience.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL | *Familiar: Python*
Backend Development: Node.js, Express.js, REST APIs, Webhooks, Socket.IO, Razorpay payment integration
Frontend Development: React.js, HTML5, CSS3
Cloud & DevOps: AWS (Lambda, Cognito, Amplify, EC2, SNS, KMS), Serverless Framework, CI/CD, PM2 | *Familiar: Docker*
Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Prisma, Drizzle ORM
Real-Time Communication: LiveKit, WebRTC, Twilio, Asterisk, SIP/VoIP
AI & Emerging Technologies: Google ADK, Agentic AI | *Familiar: LangChain, Hugging Face*

WORK EXPERIENCE

Cubastion Technology Partner | Software Developer **Aug 2026 – Present**

- Implement frontend changes in an existing enterprise application codebase using React.js and TypeScript.
- Investigate and debug frontend issues, tracing defects through the existing code to resolve them.
- Work with the development team to understand business requirements and translate them into frontend changes.

LegitBytes | Software Developer **2024 – 2026**

Tazzo AI – *AI-powered voice automation and real-time communication platform*

- Designed and developed RESTful APIs with Node.js and Express.js for AI-powered voice automation and real-time communication workflows.
- Integrated LiveKit, Twilio and Asterisk to enable telephony automation, voice calling and WebRTC-based real-time communication features.
- Built secure payment and subscription workflows with Razorpay, including webhook-based event handling.
- Designed and optimized PostgreSQL schemas and implemented data access layers with Prisma and Drizzle ORM.
- Built an AI-powered meeting scheduling solution integrating Google ADK and Cal.com for automated appointment booking.
- Managed backend deployments, monitoring and process management using PM2 and AWS infrastructure.

Insmeal Store App – *Restaurant management and online ordering platform*

- Developed and maintained platform features across the stack using React.js, Node.js and AWS services.
- Built scalable cloud-native backend services with AWS Lambda, DynamoDB and Serverless Framework.
- Integrated secure authentication with Multi-Factor Authentication (MFA) using AWS Amplify and Cognito, and delivered SMS-based communication features.
- Collaborated with cross-functional teams to deliver new features, bug fixes and performance improvements.

EDUCATION

Master of Computer Applications (MCA), University of Kashmir **2023**
Bachelor of Computer Applications (BCA), University of Kashmir **2021**
